Armoured doors - Door Thickness: 177 mm

The PK7 model, with hinges on the right or left side, meets medium security requirements: the defenses are connected together as a monolith of high strength.

This door is recommended for a vault of medium security level.

Specifications

- outside and inside steel sheeting
- conglomerate armor plate with a built-in steel mesh
- defences guarantee full protection of the locking mechanism chamber which can be checked for inspection
- automatic system of bolts stoppage in case of lock-picking (not visible from the outside)
- The lock between door and frame consists in 5 rectangular bolts in total, 3 on vertical side and 1+1 on horizontal side
- On the hinge-side there is a pull-proof fixed bar
